Analyze this Student Management System.
1. Main Features
2. High Risk Modules
3. Recommended Test Scenarios

To analyze a Student Management System (SMS), I'll assume a typical university/school web application that manages students, courses, enrollment, grades, attendance, and reports.

1. Main Features

Student Management

- Add new student
- Update student profile
- Delete/deactivate student
- Search and view student records
- Manage student status (active, graduated, suspended)

Course Management

2. tạo test case

The screenshot shows a VS Code editor with a project named 'student-management-system'. The Explorer panel on the left shows the file structure, including 'TEST_REPORT.md'. The main editor displays the content of 'TEST_REPORT.md', which is a test report for the system. The report includes a table of test cases with columns for ID, Test Scenario, Test Data, Expected Result, and Status. The test cases cover various scenarios such as adding a student, updating a student profile, deleting a student, and managing student status. The report also includes a section for 'High Risk Modules' and 'Recommended Test Scenarios'. The terminal panel at the bottom shows the command prompt output for the project, including the installation of dependencies and the running of the development server.

```
testing > TEST_REPORT.md > # TEST REPORT
1 # TEST REPORT
2
3 | ID | Test Scenario | Test Data | Expected Result | Status |
4 |----|-----|-----|-----|-----|
5 | TC01 | Add valid student | Valid ID, Name, Email, Phone, GPA=3.5 | Student added successfully | PASS |
6 | TC02 | Empty Student ID | Student ID = blank | Validation error displayed | PASS |
7 | TC03 | Duplicate Student ID | Existing Student ID | Duplicate ID error | PASS |
8 | TC04 | Empty Full Name | Name = blank | Validation error displayed | PASS |
9 | TC05 | Invalid Email Format | abc@gmail.com | Invalid email error | PASS |
10 | TC06 | Phone Number Length Validation | Phone = 12345678901234567890 | System should limit phone number length (e.g., 10 digits) and display validation error | FAIL |
11 | TC07 | GPA below minimum | GPA = -1 | GPA validation error | PASS |
12 | TC08 | GPA above maximum | GPA = 4.5 | GPA validation error | PASS |
13 | TC09 | Future Date of Birth | DOB = future date | Date validation error | PASS |
14 | TC10 | GPA = 4.0 | GPA = 4.0 | Student added successfully | PASS |
15 | TC11 | GPA = 0.0 | GPA = 0.0 | Student added successfully | PASS |
16 | TC12 | Long Name | 100+ characters | Handled correctly | PASS |

chat gpt phân tích và đề xuất prompt

Prompt:

I found a failed test case in a Student Management System.

Feature: Add Student

Test Case:
Phone Number Length Validation

Input:
12345678901234567890

Expected Result:
The system should reject phone numbers exceeding the maximum allowed length.

Actual Result:
The system accepted the phone number and added the student successfully.

Please:
1. Analyze the root cause.
2. Explain why this is a defect.
3. Assess the impact on the system.
4. Suggest a fix.

đề xuất sửa

limit phone number length: 10 digits

yêu cầu sửa lại code thêm điều kiện giới hạn số điện chỉ 10 digits (gg ai studio)

trong chức năng Add Student (và Edit Student):

Những thay đổi đã thực hiện:

- Ràng buộc Validation** (`/src/utills/validation.ts`): Thêm quy tắc kiểm tra định dạng chính xác 10 chữ số (`/^\d{10}$/`). Nếu người dùng nhập ít hơn, nhiều hơn 10 chữ số hoặc chứa ký tự khác, hệ thống sẽ hiển thị thông báo lỗi: *"Phone number must be exactly 10 digits (e.g., 0912345678)."*
- Giao diện Form** (`/src/components/StudentFormModal.tsx`):
 - Thêm thuộc tính `maxLength={10}` vào ô nhập Số điện thoại để hạn chế người dùng gõ quá 10 ký tự.
 - Cập nhật nhãn hiển thị thành `Phone Number (10 digits)` và placeholder ví dụ `0912345678`.
- Dữ liệu mẫu & Test Suite**:
 - Cập nhật dữ liệu mẫu ban đầu về định dạng 10 chữ số chuẩn.
 - Bổ sung Test Case **TC-ADD-006** vào danh sách QA Test Suite trong bảng tài liệu yêu cầu.
